Dimensional and movable books

At Blossom Books we work to develop concepts into dimensional and movable books along with other novelty formats. We are a packager, publisher, design studio and a developer of ideas.

In 2014 David and Angela formed Blossom Books, with David being the creative mind and Angela helping his visions become finished books through co-edition and license sales. With loyal followers of David's projects, we have titles published in many countries including France, Spain, Japan, Taiwan, Korea, Italy, Germany, Brazil and China.

Every title in this guide is available for translation and co-edition. Novelty formats are manufactured rather than simply printed, so co-editions live or die on timing — several language editions produced in a single manufacturing window cost a fraction of the same editions produced separately.

Where to find us

Frankfurter Buchmesse 7–11 October 2026 Frankfurt, Germany · Hall 4.2, Stand A72
